

## Performance Evaluation and Analysis Consortium (PEAC) End Station

Patrick Worley  
Computer Science and Mathematics Division  
Oak Ridge National Laboratory

The PEAC end station provides the performance evaluation and performance tool developer communities access to the National Leadership Computing Facility (NLCF) systems. The consortium goals are: system evaluation, performance tool development, performance modeling, application analysis and optimization, and application and performance community support. A brief overview of the PEAC end station will be presented, including recent evaluation and tool development results.
